### DETAILED ACTION

The amendment of 8/1/2005 (e.g., the newly added limitation “each spring sheet having a fixed end connected substantially adjacent to the socket end and a cantilevered portion extending from the fixed end toward the mounting end of the bracket” in lines 5-7 of claim 15) requires further burdensome search thus necessitating the following Restriction Requirement.

#### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11 and 21-23, drawn to a post and railing assembly, classified in class 256, subclass 65.01.
- II. Claims 15-20 and 24, drawn to a bracket, classified in class 248, subclass 248.4.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the post and railing assembly of Group I does not require “each spring sheet having a fixed end connected substantially adjacent to the socket end and a cantilevered portion extending from the fixed end toward the mounting end of the bracket” (lines 5-7 of claim 15).

Art Unit: 3679

The subcombination has separate utility such as within a wall and railing assembly, rather than the post and railing assembly of claim 1.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

A telephone call was made to Christopher A. Rothe on 10/14/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
